NAME _____

GROUNDHOG DAY

WHAT IS GROUNDHOG DAY?

Groundhog Day is celebrated every year on February 2nd in the United States and Canada. On this day, people use a groundhog to predict the weather.

WEATHER PREDICTION

When the groundhog comes out on Groundhog Day, the weather decides if it sees its shadow. On sunny days, it sees its shadow, gets scared, and returns to its burrow, meaning six more weeks of winter. On cloudy days, there's no shadow, so it stays outside, signaling an early spring.

CELEBRATIONS

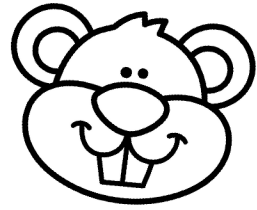

The most famous Groundhog Day celebration happens in Punxsutawney, Pennsylvania. Here, a special groundhog named Punxsutawney Phil makes the weather prediction. Thousands of people gather to watch and celebrate this fun event.

ORIGIN

The tradition comes from old European customs where people used animals to predict the weather. German immigrants brought this idea to North America.
